

Our corporate mission statement

Guiding concept:
NEW IDEAS. NEW HORIZONS. SINCE 1937.

Guiding principle:
INNOVATION WITH AND FOR CUSTOMERS.

Guiding Principles:

- The requests and requirements of our customers motivate us to create individual solutions of the highest quality.
- Our main focus is always Customer satisfaction.
- Relationships with our business partners are characterized by mutual respect and openness: the basis of our partnerships.
- Compliance with technical, ethical, and ecological standards along with contractual obligations is of utmost importance to us.
- Together with our business partners, we choose to protect the environment, conserve resources, and prevent unnecessary environmental pollution. We continuously evaluate and work to improve this.
- Through innovative product solutions that are characterized by a high level of safety and longevity, we are pushing ahead by expanding into new markets and meeting the standards of technically demanding markets.
- In pursuing our corporate goals, we prioritize sustainability, quality, and environmental standards, as well as the continuous development and training of our employees.
- A positive working atmosphere is fundamental to our success. To achieve this, we have established a transparent flow of information along with open communication at all levels.

How we prove ourselves:

- Customized and project-specific product solutions
- Fast response times
- High stock availability
- On-site customer service
- After-sales Service
- Latest 3D CAD technologies
- State-of-the-art CNC manufacturing technologies

What we stand for:

- Tradition
- Experience
- Consistency
- Reliability
- Innovation
- Social responsibility

USE OUR STRENGTHS TO YOUR ADVANTAGE!
